Sure sign of a well kept VW.

Battered service books belong to the most careful Volkswagen owners.

True, a VW will often keep on going just so long as there's petrol in the tank and air in the tyres. But after 90,000 miles you can tell the difference in a Volkswagen that's been serviced regularly.

And the Volkswagen was designed for regular servicing. That's why it takes

so little time and money to have it done.

For a car that holds together so well it's amazing how a Volkswagen comes to pieces in the hands of a VW mechanic. Of course he's had intensive factory training—and all the special VW tools are there to make the job easier.

Still, every 3 years he goes back to the VW school for a refresher course.

You might say we make sure he gets a regular servicing, too.

So much a part of Christmas!

To thousands of Dubliners and more thousands from the remoter parts of Ireland, Christmas would be lacking without a visit to Clerys. It is the endless and colourful array of gifts, the tremendous variety of toys and novelties that catch the eye. There's no need to emphasise the fact that it is the promise of very special Clery-low prices that provides the extra attraction!

PIECEFUL ENERGY

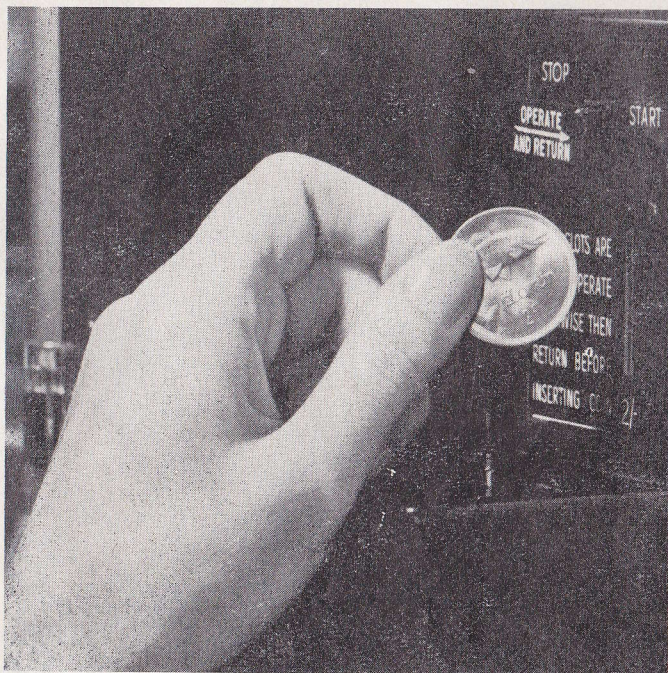

The word 'bread' comes from a Teutonic root meaning piece . . . in the old days everyone knew it could only refer to the all-important piece of bread. Bread gave the men of yesterday energy to build roads-cities-empires. To-day, pieces of Kennedys bread, buttered and delicious, help to build the men who build.

Experienced travellers fly everywhere by KLM on business...and on holiday

*(KLM fly from Dublin and Shannon to Africa,
the Far East and South America—
to 105 cities in 68 countries.)*

Just why do so many seasoned travellers make it their business to fly KLM? Because of KLM's outstanding record of on-time regularity and consistently high standard of service and comfort? Could be. It may be because they know KLM have 45 years of experience in the airline business behind them. There are so many reasons why experienced travellers know that in every detail of air travel, they can rely on KLM.

1. KLM keep a continuous check on cabin service and passenger comfort. Four Superintendents and 8 Purser constantly roam KLM air routes satisfying themselves that the Company's high standards are maintained.

2. On KLM intercontinental First Class flights, you get slippers, hot towels, champagne and other wines on the house. Superb meals, master-minded by some of Europe's most talented chefs are served on all flights. Even KLM's Economy Class menus include items like fillet mignon, poulet de grain roti or dindonneau a la catalane. Whatever the class, KLM service meets the same high standards.

3. There are 60 KLM aircraft flying to all six continents and every one answers KLM's exacting requirements. On intercontinental services KLM operate the DC-8 Jet, and on most European and

medium distance routes the spacious Electra II.

4. Each DC-8 Jet receives a complete inspection after every 15 hours in the air. After every 3,000 hours of flying, KLM completely strip their DC-8 Jets. The seats go to the carpenters and upholsterers, precision instruments to the electrical and radio workshops, engines to the testing tunnel.

5. Your Travel Agent knows all about the advantages of flying with reliable KLM. He will be glad to help you. And wherever you are, anywhere in the world, so will KLM.
